Education

Bachelor of Engineering in Computer Science & Engineering **Expected 2028**
Sahyadri College of Engineering & Management, Mangaluru, Karnataka *5th Semester*

Technical Skills

Languages: C, C++, Java, JavaScript, Python
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, Socket.IO, Mongoose
Databases: MongoDB, PostgreSQL, Supabase, Redis
AI & Integration: Groq AI
Tools: Git, GitHub, VS Code, Postman, Docker, Vercel, Render, AWS EC2

Projects

Email Threat Detection Platform *React.js, FastAPI, Python*

- Developed a web-based platform for analyzing email content and identifying potential security threats.
- Built a React.js frontend for submitting emails and displaying threat analysis results.
- Implemented backend APIs using FastAPI and Python for email processing and threat analysis.
- Designed the system to identify suspicious email characteristics and potential phishing threats.

Movie Ticket Booking System *React.js, Node.js, Express.js, Supabase, Redis, Socket.IO, Groq AI*

- Developed a full-stack movie ticket booking system with movie, seat, and booking management.
- Used Redis for temporary seat locking to prevent concurrent booking conflicts.
- Implemented real-time seat and booking functionality using Socket.IO.
- Integrated Supabase/PostgreSQL for persistent data and Groq AI for movie recommendations.

QR Attendance System *React.js, Node.js, Express.js, MongoDB, JWT*

- Developed a QR-based attendance system with separate Teacher and Student roles.
- Implemented time-limited QR codes that expire after 60 seconds for attendance marking.
- Enabled students to scan active QR codes and record attendance.
- Implemented role-based access and attendance management.

Authentication & Authorization System *Node.js, Express.js, MongoDB, JWT, bcrypt*

- Built secure registration and login functionality with protected API routes.
- Implemented JWT-based authentication and role-based access control for Admin and Student users.
- Used bcrypt for password hashing and secure credential storage.

Mini WhatsApp API *Node.js, Express.js, REST APIs*

- Developed REST APIs for WhatsApp-style messaging functionality.
- Implemented backend routes using Node.js and Express.js for handling messaging operations.
- Designed API endpoints for managing users and message-related functionality.
- Applied REST API concepts to build and test server-side communication workflows.

Training & Certifications

MERN Stack Training *Technical Career Education*
Sahyadri College of Engineering & Management

- Completed 24-hour training focused on full-stack web development using MongoDB, Express.js, React.js, and Node.js.

Backend Development with Node.js *Technical Career Education*
Sahyadri College of Engineering & Management

- Completed 24-hour training covering RESTful APIs, database integration, authentication, middleware, and server-side application development.
